

Adham Amr Nabil Yacout

Session 1:

Ai models without data:

- 1) Chatbots
  - 2) Some games like xo
- 

Interpreted vs compiled

A compiled language is converted into machine code so that the processor can execute .An interpreted language is a language in which the implementations execute instructions directly without earlier compiling a program into machine language.

---

- 3) R is an open source programming language and software environment for statistical computing and graphics. It is one of the primary languages used by data scientists and statisticians alike.
